You are advised to read it so you can make an informed decision about whether to invest.

AMUNDI FUNDS GLOBAL TOTAL RETURN BOND - A EUR A Sub-Fund of the SICAV AMUNDI FUNDS

ISIN codes: (A) LU1253539594, (D) LU1253539677

This UCITS has appointed Amundi Luxembourg SA, an entity part of Amundi group, as its Management Company

Objectives and Investment Policy

To achieve a combination of income and capital growth (total return). Specifically, the Sub-Fund invests as a feeder fund in Amundi ObligInternationales (master fund) that seeks to outperform (after applicable fees) the JP Morgan Global Government Bond Index Broad index over the recommended holding period.

The Sub-Fund invests at least 85% of net assets in units of the master fund (OR-D class). The Sub-Fund may invest up to 15% in deposits and derivatives that are used for hedging only.

The master fund invests up to 100% in:

- bonds issued or guaranteed by OECD member states,

- investment-grade bonds and convertible bonds issued by companies that are headquartered, or do substantial business, in the OECD,

- MBSs and ABSs rated AAA (S&P) or Aaa (Moody's) at the time of the purchase and downgraded not less than AA or Aa2 when held.

The master fund actively manages its exposure to interest rate and foreign exchange markets.

The master fund makes extensive use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on credit and foreign exchange).

The master fund's net income is automatically distributed and its net realised capital gains are automatically reinvested or distributed each year.

Management Process : The Sub-Fund integrates Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investment" of the Prospectus. The master fund's investment team uses a wide range of strategic and tactical positions, including arbitrage among credit, interest rate and currency markets, in assembling a highly diversified portfolio.

The accumulation share automatically retains, and re-invests, net investment incomes within the Sub-Fund when the distribution share pays dividends in September of each year.

The minimum recommended holding term is 3 years.

Shares may be sold or redeemed (and/or converted) on any dealing day (except otherwise stated in the prospectus) at the respective dealing price (net asset value) in accordance with the articles of incorporation. Further details are provided in the prospectus of the UCITS.

Risk and Reward Profile

The risk level of this Sub-Fund mainly reflects the market risk arising from investments in international bonds and its investment process.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Your initial investment does not benefit from any guarantee or protection.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.

The respective dealing cut-off time for the Sub-Fund and the Master Fund are set so that valid subscription or redemption orders for shares of the Sub-Fund are placed before the cut-off time of the Master Fund so as to be processed at a same dealing day. Further details are provided in the prospectus of the Master Fund.

- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- Emerging Markets risk : Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

The use of complex products such as financial derivative instruments might increase market movements in your portfolio.

The occurrence of any of these risks may have an impact on the net asset value of your portfolio.
