You are advised to read it so you can make an informed decision about whether to invest.

AMUNDI FUNDS MULTI-STRATEGY GROWTH - I2 GBP A Sub-Fund of the SICAV AMUNDI FUNDS

ISIN code: (A) LU1897309008

This UCITS has appointed Amundi Luxembourg SA, an entity part of Amundi group, as its Management Company

Objectives and Investment Policy

The Sub-Fund is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation.

Seeks to achieve positive returns in excess of cash over a full market cycle over the recommended holding period.

The Sub-Fund invests in a broad range of securities from around the world, including emerging markets. These investments may include government and corporate bonds of any maturity, equities, convertible bonds (including up to 10% in contingent convertible bonds) and money market securities. The Sub-Fund may invest up to 10% of net assets in ABSs and MBSs. The Sub-Fund's investments will mainly be denominated in euro, other European currencies, U.S. dollars or Japanese yen.

The Sub-Fund makes use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on credit, equities, interest rates, foreign exchange, volatility and inflation).

Benchmark : The Sub-Fund is actively managed and uses the Euro Short Term Rate Index (ESTER) a posteriori as an indicator for assessing the Sub-Fund's performance and, as regards the performance fee benchmark used by relevant share classes, for calculating the performance fees. There are no constraints relative to any such Benchmark restraining portfolio construction. The Sub-Fund has not designated the Benchmark as a reference benchmark for the purpose of the Disclosure Regulation.

Management Process : The Sub-Fund integrates Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investment" of the Prospectus. The investment manager first constructs a macro strategy portfolio to provide a return not correlated to any market, and then overlays this with an investment strategy to generate excess return. The macro strategy portfolio consists of any type of equities and bonds from any type of issuers worldwide and the asset allocation and long or short positioning are driven by macroeconomic, thematic and regional scenarios. The excess return strategy principally targets interest rates, equities, corporate bonds, currencies and commodities. This strategy will take advantage of price differentials between correlated financial instruments, but will also be based on the direction in which a specific security is heading. A sophisticated process continually assesses risk and performance and determines the allocation among different types of asset classes. The Sub-Fund seeks to achieve an ESG score of its portfolio greater than that of its investment universe.

The accumulation share automatically retains, and re-invests, all attributable income within the Sub-Fund; thereby accumulating value in the price of the accumulation shares.

The minimum recommended holding term is 5 Years.

Shares may be sold or redeemed (and/or converted) on any dealing day (except otherwise stated in the prospectus) at the respective dealing price (net asset value) in accordance with the articles of incorporation. Further details are provided in the prospectus of the UCITS.

Risk and Reward Profile

The risk level of this Sub-Fund reflects the maximum projected volatility of the portfolio.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Your initial investment does not benefit from any guarantee or protection.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.

- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- Emerging Markets risk : Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

The use of complex products such as financial derivative instruments might increase market movements in your portfolio.

The occurrence of any of these risks may have an impact on the net asset value of your portfolio.
